Software Engineer — Montreal, Canada — Open to Relocation

Summary

Software Engineer with experience building and shipping production applications across frontend, backend, databases, APIs, and cloud infrastructure. Experienced in full-stack development, system integration, automation, and delivering scalable user-facing products.

Education

Bachelor of Engineering in Software Engineering • Graduated with Distinction 2022 – 2026
Concordia University, Montreal, Canada

Technical Skills

Software Engineering: System Design, Software Architecture, OOP, Design Patterns, API Design, Testing, Agile/Scrum

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML/CSS

Frontend & Backend: React, Next.js, Node.js, Express.js, Spring Boot, FastAPI, REST APIs, WebSockets

Data & Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Prisma, Pandas, NumPy

Cloud, DevOps & Integrations: AWS, Docker, CI/CD, Railway, Nginx, Git, GitHub, Postman, OAuth, Webhooks, API Integrations

Experience

Freelance Software Engineer — **Atelier Magique**, *Remote* May 2026 – Present

- Leading the end-to-end rebuild of a production e-commerce platform from WordPress/WooCommerce to Next.js, Node.js/Express, PostgreSQL, and Prisma.
- Own full-stack delivery across product catalog, search, authentication, checkout, orders, promotions, gift cards, registries, and transactional email.
- Designed production infrastructure and legacy migration across Railway, Cloudinary, database migrations, DNS, SEO redirects, and third-party integrations.
- Built admin automation and AI-assisted workflows for product management, catalog enrichment, SEO generation, and operational processes.

Software Developer Intern — **Coveo**, *Montreal, Canada* Sept. 2025 – Dec. 2025

- Built client-facing applications and proof-of-concepts used by Solutions Engineers in live technical demonstrations.
- Developed AI-powered search experiences and reusable components while testing edge cases and application reliability.
- Translated customer requirements into production-quality technical demos, contributing to over \$200K in revenue.

Junior Software Project Manager — **Expert Shipping**, *Montreal, Canada* Mar. 2023 – Apr. 2024

- Led development of an automated billing verification system, reducing processing time from 20 hours to 1.5 hours.
- Improved billing verification and discrepancy detection, identifying and successfully claiming approximately \$85K in overcharged invoices.

Selected Projects

FoodFlow — Real-Time Surplus Food Redistribution Platform Sept. 2025 – Apr. 2026

Project Manager & Frontend Lead — 11-Person Capstone Team — React 19, Spring Boot, PostgreSQL, WebSockets, Docker

- Led technical delivery for an 11-person capstone team, coordinating the development of a multi-role platform connecting food businesses with verified charities and community kitchens.
- Architected complex frontend workflows and role-based interfaces for donors, receivers, and administrators, applying reusable component design, separation of concerns, and maintainable state management.
- Integrated React with Spring Boot REST APIs, PostgreSQL, and WebSockets to support authentication, real-time donation updates, status synchronization, interactive maps, and pickup coordination.
- Coordinated development across frontend, backend, database, and integration workstreams, managing feature dependencies, API contracts, testing, and iterative delivery.

Bambuu — Personal Finance Platform Mar. 2026

Project Manager & Full-Stack Developer — 1st Place, FinTech Hackathon — React, TypeScript, Supabase

- Led a 4-person team to design and build a bilingual personal finance application for students with irregular income.
- Built transaction tracking, subscriptions, recurring transactions, savings goals, multi-currency support, and interactive financial dashboards.
- Developed AI-powered spending insights, personalized financial guidance, student discount detection, and investment education.
